General Hints for the Excel roster

Moving around in cells

Each box in the workbook is referred to as a cell
Use the **TAB** key to move from cell to cell.

Navigating the workbook using buttons

Navigation buttons have been provided to assist you as you move through the workbook. Simply click on the “Next” button to move to the next page and the “Previous” button to move to the previous page. In many cases the “Next” button has checks built in, which will help troubleshoot your workbook prior to submitting it. Fixing the errors these checks find will allow for your roster and its information to be uploaded in a more efficient manner.

Using the tabs at the bottom

If you are unable to use the navigation buttons to move through the workbook, you can use the sheet tabs. At the bottom of the workbook you will see six tabs. If you cannot see all the tabs, move the arrow (left of the tabs) at the bottom of the screen to the left or right. If you still can't see tabs go to tools (on your toolbar)/options/view/window options/sheet tabs and see if sheet tabs is checked. Simply click on the page you would like to view. The tabs **DO NOT** safeguard against errors which could cause delays in processing your roster.

Caps Lock Key

Click on the **Caps Lock** key on the keyboard. All information should be entered in UPPERCASE.

Description/Dialogue Box and Code Menu

Most cells will automatically open a description/dialogue box – this will give you an explanation of information requested. You can “**drag**” this dialogue box to any location on your screen and it will stay there for any cell that you are viewing.

Cells with dialogue boxes will have a **down arrow in the lower right corner of the cell** – click on this arrow and it will show you a menu - select the correct code from this menu.

Cutting and pasting in the workbook

Warning: Do NOT cut and paste in the workbook! It affects the operation of the macros.
